

ARCHIDICT is an illustrative multilingual dictionary for architects, builders and construction workers. An innovative tool not only for learning terms in a foreign language but also for understanding and learning the technology and the profession itself with the help of the illustrated graphics. Unique and unified design of technical illustrations provide clear understanding of the connecting terminology and the discussed subjects, giving the chance for drawings to act as the main media in explaining building techniques with the help of the associated terms. ARCHIDICT wants to support those working in the architecture and construction field, students willing to increase their knowledge. ARCHIDICT provides a multilingual learning tool to teachers and educators.

## Main challenge, Key Success and Enabling Factors

- Present a completely innovative multifunctional teaching tool
- Create a new way of presenting the learning material
- Promote the change of the teaching / learning process through the use of new technologies
- Promote innovative teaching methods

## Lessons Learnt and Recommendations

- The tool is still in a development phase. Results and feedback will be present in 2020
