

The 76th School in Sofia, Bulgaria provides the students who cannot attend regular classes for a certain period of time with live online consultations in VEDAMO Virtual Classroom. The real-time online catch-up sessions lead to better pupil's performance and parents' involvement. The school's management decided to start using a Virtual Classroom as a way to enhance pupil performance. This also decreased the stress levels of children who had to make up for what they had missed in class.

## Main challenge, Key Success and Enabling Factors

- Present an innovative teaching tool
- Create a new attractive and effective way of presenting the learning material to the students
- Promote the change of the teaching / learning process through the use of new technologies
- Promote innovative teaching methods

## Lessons Learnt and Recommendations

- Persistence was of high importance, as blended learning truly does have a lot of advantages. Learning, material preparation can happen anywhere and anytime at one's own pace.
